Tile Fixing Instructions

- Plaster the surface of the floor where the tiles will be laid with smooth finish and complete the plastering and curing at least two weeks prior to laying.
- Before fixing MARBOCERA tiles, lay them out in the desired pattern and make sure that they give an acceptable blend of color. Please note that certain amount of shade variation is inherent in the manufacture of fully vitrified ceramic tiles .THE COMPANY WILL BEAR NO LIABILITY AFTER THE TILES ARE FIXED
- The company bears no responsibility towards the tiles exposed to any outside process like transfers, printing, firing etc.
- For fixing MARBOCERA, we recommend the use of tile fixing adhesives for best result. Also follow the fixing instruction provided along with the adhesives.
- For fixing MARBOCERA tiles on the floor, using sand and cement, follow the instructions given below:
 - Use cement and sand mortar in the ratio of 1:4. Add some water to create a consistent paste.
 - Once the mixing has completed do not add any further water and use the same within one hour.
 - Apply a 20-30 mm, layer of bedding material over an area of 1 square meter at a time on the surface of the area. Apply fine slurry to the back of the tile to ensure proper and full bedding. Press gently for even adherence at the back of the tile.

DO NOT USE AN IRON HAMMER OR SOME HEAVY MATERIAL TO PRESS THE TILES
- For fixing MARBOCERA tiles on Dado, we recommend the use of tile fixing adhesive with proper troweling method for 100 per cent coverage behind the tiles and for peerless bonding. Pleas follow the manufacturer's instructions for the same. We do not recommend the use of sand and cement for fixing on dado.
- Make and lay out the tiles from the center of the area to be laid so that cut tiles, if any, will be on outer edges towards the walls.
- The work size which we try to maintain for better technical performance is 600mm x 600mm, 600mm x 1200mm on average. It is advisable to maintain a gap of 1 mm to 2mm between every two tiles to allow for possible expansion as per BIS/EN tolerance norms.
- Complete the laying process by pressing the cut MARBOCERA tiles firmly into place along the walls/floors.
- Allow 3-4 days for bed curing. After this period fill the joints with grouts. Usage of grout sealant is recommended for keeping the grout free of dust.
- Fifteen minutes after finishing the grouting process, wipe off excess grout with a damp sponge and polish the tiles with a soft and dry cloth for a clean surface. The tiles can also be cleaned with mild acid (However, Hydrofluoric acid and its derivation should not be used).
- Please note that the company does not accept any liability in case of problems arising out of non-adherence to these fixing instructions.

Kindly look for the arrow (→) on the back of the tile and follow the laying pattern as
